+ projects

Online Two Player Chess

Final team project of the UofT coding bootcamp. A two playing online game of chess. The project was to create the game itself and to allow for anyone to create an account and join games and see their win/loss record on their account.

Flixter

A platform for online learning. The Flixter application allows for students to enrol in courses set up by teachers, the student can pay for the teachers program using Stripe API. Teachers can upload courses and video lessons in each course, using Javascript to reorder the lesson listings.

Nomster

An application that mimics YELP, allowing for users to upload restaurants and bars to the application. Reviews, comments, and ratings can be given by other users for the uploads on the application.

Grammable

An application that mimics Instagram. The app allows for users to create accounts and upload photos with captions; allows for the user to edit the caption and to leave comments on other users posts.
